OBJECTIVES

2025 NCODA INTERNATIONAL
FALL SUMMIT

1. Describe current and emerging applications of artificial intelligence in nursing, pharmacy, and provider practice, particularly within oncology care settings.

2. Summarize ethical, safety, and workflow considerations when integrating AI tools into clinical decision-making and patient care.

3. Outline key methods for enhancing AI literacy and competency among providers, nurses, pharmacist, and pharmacy technicians.

SUMMARY

2025 NCODA INTERNATIONAL FALL SUMMIT

- AI is transforming the healthcare landscape with enhanced decision-making capabilities, more personalization to individual patient needs, and increased efficiency.
- Continuous monitoring, human involvement, and validation processes are essential to ensuring accuracy and to prevent patient harm
- Ongoing training through multiple learning modalities will be key to empowering healthcare professionals to utilize AI competently, ethically, and efficiently
- Effective adoption is dependent on aligning AI tools with existing workflows, clarifying human-AI roles, and promoting collaborative care rather than replacement.
